

High Performance Liquid Chromatography / Gel Permeation Chromatography

Make: SHIMADZU

Stationary Phase : Silica gel

Mobile Phase : For HPLC Analysis Methanol, methanol-water, acetonitrile, acetonitrile-water.
For GPC Analysis Tetrahydrofuran.

Column : CLC-ODS-C18, Styragel

Pump : LC-20AD

Injection per sample : 20 μ l

Detector : PDA ,RI Detectors

Sample : Liquids

Software : LC Solutions

Application:-

In Drugs, Pharmaceuticals and Polymer Industries.
