LIST OF PUBLICATIONS OF Dr. L. JOHN BERCHMANS

ENVIRONMENTAL SCIENCE AND ENGINEERING

   L. John Berchmans and R. Vijayavalli,

[2] Electrochemical oxidation as a tool for pollution control - Studies on the central packed bed
   electrolysers for the destruction of cyanide.
   Rm. Sabarathinam, L. John Berchmans, C.A. Basha and R. Vijayavalli

   L. John Berchmans and R. Vijayavalli.

[4] Electrochemical oxidation as a tool for pollution control - Effect of anodic oxidation on the
   treatment of distillery effluent.
   L. John Berchmans and R. Vijayavalli.

   L. John Berchmans and R. Vijayavalli.
   Bull. Electrochem. 6 (12) 467.

   reactor system.
   L. John Berchmans, Rm. Sabarathinam, C.A. Basha and R. Vijayavalli

[7] Investigations on the simultaneous removal of cyanide and cadmium using packed bed
   reactors.
   L. John Berchmans, Rm. Sabarathinam, C.A. Basha and R. Vijayavalli
   Trans. Metal Finishers Assoc. of India. 1 (2) (1992) 45.

  L. John Berchmans, Rm. Sabarathinam, C.A. Basha and R. Vijayavalli.

  L. John Berchmans, N. Kannan and R. Vijayavalli.

  Transactions of the SAEST, 34, 2, Apr-Jun (1999).

**CORROSION SCIENCE AND ENGINEERING**

  O.S.A.S. Hussain, L. John Berchmans and D. Mukerjee

[12] General corrosion studies on Modified 9 Cr-1 Mo steel weldments in acid media.

  L. John Berchmans, V. Kapali, S. Natarajan and V. Sivan.

[13] Stress corrosion cracking (SCC) / Hydrogen embrittlement susceptibility studies on Modified 9 Cr-1 Mo steel weldments in acid and neutral media.

  L. John Berchmans, S. Muraluidharan, N.S. Rengasamy, S. Natarajan, V. Sivan and S. V. K. Iyer

[14] Synergistic influence of iodide ions on the inhibition of corrosion of mild steel in sulphuric acid by n-hexylamine.

  S. Muraluidharan, L. John Berchmans and S. V. K. Iyer

  L. John Berchmans and D. Mukerjee.
[16] Plant based alkaloids inhibit corrosion of marine alloys.
  
  **L.John Berchmans** and D.Mukerjee.

  Anti corrosion Methods and Materials. 44 (3) (1997) 186.

[17] Influence of Triazole derivatives on the inhibition of corrosion of Arsenical aluminium brass in 3.5% NaCl.
  

  
  D.Chidambaram, **L.John Berchmans** and V.Kapali.

[19] Influence of Triazole derivatives on the inhibition of corrosion of Muntz metal in 3.5%NaCl solution.
  

  Presented at the 7th National Congress on Corrosion Control-1997, Hyderabad.

  
  V.Muthupandian, S.Sunderasen, **L.John Berchmans** and S.V.K.Iyer.

[21] Influence of Triazole derivatives on the inhibition of corrosion of Copper in 3.5% NaCl solution.
  

[22] Studies on Triazole derivatives as inhibitors for the corrosion of Admiralty Brass in 3.5% NaCl.
  

[23] 1,2,4,5 tetrazo spiro (5,4) decane-3 thione as a corrosion inhibitor for arsenical aluminium brass in 3.5% NaCl solution.

METALLURGICAL AND MATERIALS SCIENCE.

[24] Operation of 1000 A Hall-Heroult cell at 800 C.

Presented at the 36th NMD and 52nd ATM of Indian Institute of Metals, Bangalore, 14-17,1998.

[25] Investigations on SrFeO$_3$ as an anode for molten salt metallurgy.

Presented at the 36th NMD and 52nd ATM of Indian Institute of Metals, Bangalore, 14-17 (1998).

[26] Low Temperature aluminium electrolysis.

[27] An experiences in the Development of Magnesium technology at CECRI.

[28] Electrowinning of Al - Industry in search of a suitable anode.

[29] Investigations on LaCrO$_3$ as an inert anode.

Presented at the 39thNMD, 55th ATM-IIM, Bhubaneswar, 18-21, Nov-2001.
[31] Eco friendly anodes for non-ferrous metallurgy.

   L. John Berchmans, S. Angappan, R. Kalai Selvan, C.O. Augustin

[33] Ni_{1-x}Sn_xFe_2O_4 as an alternate anode for Aluminium electrolysis.
   S. Balaji, K. Subramanian, S. Angappan, L. John Berchmans, C.O. Augustin

[34] Studies on Lanthanum substituted Strontium ferrite – An inert anode for Aluminium Production.
   R. Nagaraj, K. Subramanian, R. Kalai Selvan, L. John Berchmans, C.O. Augustin,

   R. Kalai Selvan, C.O. Augustin, L. John Berchmans, R. Saraswathi

   G. Raj Mohan, R. Kalai Selvan, R. Saraswathi, L. John Berchmans, C.O. Augustin

[37] Structural, electrical and electrochemical properties of Co-precipitated SrFeO_3δ.
   C.O. Augustin, L. John Berchmans, R. Kalai Selvan

[38] Evaluation of Mg^{2+}-substituted NiFe_2O_4 as a green anode material.
   L. John Berchmans, R. Kalai Selvan, C.O. Augustin
[39] Structural and Electrical properties of Ni$_{1-x}$Mg$_x$Fe$_2$O$_4$ synthesized by citrate gel process.

L. John Berchmans, R. Kalai Selvan, P. N. Selva Kumar, C. O. Augustin

[40] Sintering behaviour of MgAl$_2$O$_4$ – a prospective anode material.
S. Angappan, L. John Berchmans, C. O. Augustin

[41] Effect of La$^{3+}$ substitution on the structural, electrical and electrochemical properties of strontium ferrite by citrate combustion method.
C. O. Augustin, L. John Berchmans, R. Kalai Selvan, R. Nagaraj.

[42] Combustion synthesis and characterization of of Sn$^{4+}$ substituted nanocrystalline NiFe$_2$O$_4$.

[43] Effect of Ce$^{4+}$ substitution on the structural, electrical and dielectric properties of NiAl$_2$O$_4$ spinel.

[44] Studies on triazole derivatives as inhibitors for the corrosion of muntz metal in acidic and neutral solutions.
L. John Berchmans, V. Sivan, S. Venkata Krishna Iyer

[45] Synthesis and characterization of CuFe$_2$O$_4$/CeO$_2$ nanocomposites
Materials Chemistry and Physics, 112, 2-1 (2008), 373-380

[46] Effect of antimony substitution on structural and electrical properties of LaFeO$_3$.
L. John Berchmans, R. Sindhu, S. Angappan, C. O. Augustin
[47] Electrosynthesis of cerium hexaboride by the molten salt technique
K. Amalajyothi, L. John Berchmans, S. Angappan, A. Visuvasam
Journal of Crystal Growth, 310, 14(2008), 3376-3379.

[48] Novel Synthesis of Cerium Hexaboride by Hexamine Route.
K. Amalajyothi and L. John Berchmans.

[49] Preparation and characterization of LaAlO₃.
L. John Berchmans, S. Angappan, A. Visuvasam, K.B. Ranjith Kumar
Materials Chemistry and Physics, 109, 1, (2008), 113-118

[50] Electrosynthesis of cerium hexaboride using lithium tetraborate.
Materials and Manufacturing Processes, 24 (2009), 546-549.

[51] Electrochemical synthesis and characterization of BaB₆ from molten metal.

K. Amalajyothi and L. John Berchmans.

[53] Preparation of Lanthanum Ferrite substituted with Ca and Mg
Materials and Manufacturing Processes, 24, (2009), Pages 546-549.

L. J. Berchmans, B. Bharathi, K. Amalajyothi and K. Subramanian

[55] Novel Combustion Synthesis of La³⁺ - Substituted MnFe₂O₄.
[56] Combustion synthesis of Ca_{1-x}Cu_{x}Al_{2}O_{4} (x = 0.0, 0.4 and 0.8) copper doped calcium aluminate.
K.S. Madhana Kumar, L. John Berchmans.

L. John Berchmans, V. Mani and K. Amalajyothi.

[58] Synthesis of LiMn_{2}O_{4} by molten salt technique.
M. Helan, L. John Berchmans, A. Zahir Hussain.

[59] Synthesis of LiSm_{0.01}Mn_{1.99}O_{4} by molten salt technique.
M. Helan, L. John Berchmans.

[60] Nickel ferrite (NiFe_{2}O_{4}): A possible candidate material as reference electrode for corrosion monitoring of steel in concrete environments.
S. Muralidharan, V. Saraswathy, L. John Berchmans, K. Thangavel, Ki Yong Ann

[61] A Rapid One-Step Mehanosynthesis and Characterization of Nanocrystalline CaFe_{2}O_{4} with Orthorhombic Structure

[62] Molten salt synthesis of LiMn_{2}O_{4} using chloride-carbonate melt.
M. Helan, L. John Berchmans, Timy P. Jose, A. Visuvasam, S. Angappan.

S. Angappan, A. Rajalakshmi, V. Leena, L. John Berchmans, A. Visuvasam,

[64] Electrosynthesis of samarium hexaboride using tetraborate.

[65] Combustion Synthesis of Lanthanum Substituted LiNiO$_2$ using Hexamine as a Fuel.
M. Kayalvizhi, L. John Berchmans
E-Journal of Chemistry, 7 (S1), (2010), S137-S142.

[66] Electrolytic preparation of CaB$_6$ by molten salt technique.
S. Angappan, M. Helan, A. Visuvasam, L. John Berchmans, V. Ananth

[67] Molten salt Synthesis of LiGd$_{0.01}$Mn$_{1.99}$O$_4$ using chloride-carbonate melt.
M. Helan, L. John Berchmans, V. S. Syamala Kumari, R. Ravi Sankar and V. M. Shanmugam

[68] Low Temperature Synthesis of Lithium Manganese Oxide using LiCl-Li$_2$CO$_3$ and Manganese Acetate Eutectic Mixture.
M. Helan, L. John Berchmans
Materials and Manufacturing Processes, 99999, 1(2011)1-14

[69] Mechanochemical Synthesis and Electro chemical Characterization of Nano Crystalline Calcium Ferrite
L. John Berchmans, K. Karthikeyan, M. Helan, Sheela Berchmans, V. Šepelák, K. D. Becker,

[70] Synthesis and Characterisation of Nanocrystalline Nickel Ferrite using Hexamine as a Fuel
R. Parthasarathi, L. John Berchmans, R. Prretha, G. Senguttuvan and G. Umapathy

[71] Electrosynthesis of cerium hexaboride using Lithium Tetra Borate Melt.
K. Amalajyothi, L. John Berchmans, A. Visuvasam, S. Angappan,
R. Parthasarathi, L. J. Berchmans, R. Preetha, G. Senguttuvan, and G. Umapathy  

[73] Synthesis of lanthanum nickelate and praseodymium substituted compounds by molten salt technique  
S. Ignatius Arockiam, L. John Berchmans, S. Angappan, A. Visuvasam, V. Mani  
Materials Science Forum. 699, (2012), 167-183

[74] A theoretical estimation of the charge density distribution in the diluted magnetic semiconductors of Si1-xMx and Ge1-xMx (M = V, Mn, Co)  
R. A. J. R. Sheeba, R. Saravanan and L. John Berchmans  
Materials Science Forum. 699, (2012), 167-183

[75] Doping level of Mn in high temperature grown Zn1-xMnxO studied through electronic charge distribution, Magnetization, and local structure.  
Ramachandran Saravanan, Santhanam Francis, John Berchmans.  
VERSITA, 66, 3,(2012), 226-234.

[76] Structural, Optical and Magnetic Properties of MgFe2O4 synthesised with addition of Copper.  
S. Angappan and L. John Berchmans.  

[77] A Theoretical estimation of the charge density distribution in the diluted Magnetic semiconductors of Si1-xMx and Ge1-x Mx(M= V, Mn, Co)  

[78] Magnetism in melt grown dilute magnetic semiconductor Ge1-xMnx from electron density.  
R. A. J. R. Sheeba, R. Saravanan and L. John Berchmans  
Materials Science in semiconductor processing 15, (2012), 731-739.
[79] Effect of reaction time on the synthesis and electrochemical properties of Mn$_3$O$_4$ nanoparticles by microwave assisted reflux method.
K.Vijaya Sankar, S.T. SenthilKumar, L. John Berchmans, C. Sanjeeviraja, R. Kalai Selvan

S. Ignatius Arockiam, Peter Pascal Regis, L. John Berchmans.

[81] Effect of Co Doping on the properties of ZnO bulk samples.
S. Francis, R. Saravanan and L. John Berchmans

P. Karthik Kannan, R. Saraswathi, L. John Berchmans.

[83] Low temperature synthesis of nano-crystalline gadolinium titanate by molten salt route.
N. Dharuman, L. John Berchmans.

[84] Synthesis of AlN –presence and absence of additive.
Sankaramahalingam Angappan, Ruban Angel Jeneafer, Arockiam Visuvasam and Lawrence Berchmans
Estonian Journal of Engineering, 19 (3) 2013, 239-249.

[85] Experimental Investigation on Corrosion Control of 13 Cr L80 Steel in Hydrochloric Acid Solution using Thiophene Methanol.
Rajeev P., Surendranathan A.O., Murthy Ch.S.N., John Berchmans L.
[86] Preparation and Characterization of B4C Particulate Reinforced Al-Mg Alloy Matrix Composites
M. Marimuth, L. John Berchmans

[87] A role of lithiated sarcosine TFSI on the formation of single crystalline SrTiO3 nanocubes via hydrothermal method
Gosipathala Sreedhar, A. Sivanantham , T. Baskaran , R. Rajapandian, S. Vengatesan, L. John Berchmans , Sunil G. Babu

[88] Preparation of Rare Earth - Transition Metal (Re: Y, Tm: Co) Intermetallic Compounds By Calciothermic Reduction Diffusion Process
M. Ilayaraja, L. John Berchmans, Sankara Raman Sankaranarayanan
Association of Metallurgical Engineers of Serbia. 20 (1) 2014, 35-40.

[89] Enhancing the electro catalytic activity of manganese ferrite through cerium substitution for oxygen evolution in KOH solutions
T. Pandiarajan, S. Ravichandran and L. J. Berchmans

[90] Polyolsynthesisof α-NiS particlesanditsphysico-chemical properties
S. Surendran , K.VijayaSankar , L.JohnBerchmans , R.KalaiSelvan

[91] Fabrication of spinel ferrite based alkaline anion exchange membrane water electrolyzers for hydrogen production
T.Pandiarajan, S. Ravichandran, L.J.Berchmans
RSC Adv., 5 (2015), 34100-34108

[92] Investigation on Combustion Synthesis of Nanocrystalline Nickel Ferrite Using Sodium Azide as a Potential Fuel
G. Umapathy*, G. Senguttuvan, L. John Berchmans

[93] Synthesis of Y-Ni alloy by calciothermic reduction diffusion process
Marimuthu Ilayaraja, L. John Berchmans, Sankara Raman Sankaranarayanan

[94]Signature of antiferromagnetism in entropy maximized charge density distribution of melt grown diluted magnetic semiconductor Ge12xVx
R. A. J. R. Sheeba, R. Saravanan, L. J. Berchmans

[95]Light Harvesting properties of directionally aligned CdSe Quantum dot sensitized CuBTC Metal-Organid frameworks: Investigations on sulfide mediated photo-electrochemical water splitting
(Journal of Materials Chemistry A - Under Communication)

[96]Enhanced Photoelectrochemical Water Splitting Behaviour of Tuned Band Gap CdSe QDs Sensitized LaB6
M. Soban Babu, A. Sivanantham, B. Barath Chakravarthi, R. Sujith kannan, Subhendu K. Panda, L. John Berchmans, S. B. Arya, and Gosipathala Sreedhar

[97]Structural, dielectric and AC conductivity studies of Zn substituted nickel ferrites prepared by combustion technique
G. Umapathy, G. Senguttuvan, L. John Berchmans & V. Sivakumar

[98]Investigation on the Thermodynamic analysis, preparation and characterization of LaNi5 – Hydrogen Storage Alloy by Magnesiothermic Reduction Diffusion process.
G. Giresan, S. Raman Sankaranarayanan, L. John Berchmans
Journal of Metallurgy and Mining Sec.B Metallurgy, DOI: 10.2298/JMMB150405015G.

[99]Structural, morphological, optical, magnetic and dielectric properties of Ni Zn Fe O (x = 0 – 1) nanoparticles
R. Deivakumaran, G. Sathya, S. K. Suresh Babu, L. John Berchmans

[100]Investigations on the superparamagnetic behavior of SmCo5 alloy prepared by magnesiothermic reduction- diffusion process.
G. Giresan, S. Raman Sankaranarayanan, L. John Berchmans
Intermetallics – Elsevier journal (Under Communication).

[101]Electrochemical Synthesis of Strontium Hexaboride By Molten Salt Electrolysis
G. Sathy a, M. Suresh Kumar, G. Sreedhar, S. Angappan and L. John Berchmans*
(Transactions of Indian Institute of metals – Under communication)
